(54) Title: MANAGEMENT OF THE FLOW OF PERSONS IN RELATION TO CENTERS OF CROWD CONCENTRATION VIA WIRELESS CONTROL

(57) Abstract: A method and system for the loading of patrons at multiple attractions at an entertainment includes the first-in first-out line and a priority based line. A cellular telephone is used to obtain and claim priority status. In other forms different priorities are established based on where, when and the number of priority spaces required. Different hierarchies are established for computer controlling the different lines for multiple attractions in the entertainment environment. The system and method also provide for moving people from an area of concentration to other locations.
